

What is Detox Cleansing Deodorant™?

It is an effective nighttime cleansing deodorant formulated to help cleanse away metals and impurities that have accumulated in the underarm area.

Why should I use Detox Cleansing Deodorant™?

The human body excretes waste materials through urine, stool and sweat. Some wastes are not completely excreted and remain trapped in the body. Regular cleansing helps the body function properly.

How do I use Detox Cleansing Deodorant™?

Leave on your bed stand. We recommend that it be applied nightly to clean, dry underarms prior to bedtime. Just as the daily brushing of your teeth to remove plaque is critical to good dental hygiene, nightly use of Detox Cleansing Deodorant™ is important in combating the bio accumulation of aluminum and other impurities in the underarms. Detox Cleansing Deodorant can be safely applied topically to the skin anytime. No fasting is required.

How does Detox Cleansing Deodorant™ work?

Detox Cleansing Deodorant™ works using a combination of key ingredients that have been shown in clinical tests to safely remove impurities from the acrosyringium duct. Ingredients include: Laminaria digitata (kelp) which when absorbed trans-dermally results in optimum reduction of impurities and metals. Coriandrum sativum (coriander) when applied on the underarm skin traps moisture like a sponge, and dislodges buildup and Oleae europaea (olive leaf) which is known to be effective in cleansing and removing odors.

How soon can I expect results with Detox Cleansing Deodorant™?

Detox Cleansing Deodorant™ may start to work after one application. Many factors contribute to the cleansing process. It may require additional time for your body to eliminate trapped impurities. For best results, we recommend Detox Cleansing Deodorant™ for nighttime use and Tropical Cove Deodorant or No Added Fragrance Deodorant for daytime use. We do not recommend applying any other products with the Detox Cleansing Deodorant such as: powders, lotions, perfumes, oils or other commercial deodorants or antiperspirants.

How safe is Detox Cleansing Deodorant™?

Detox Cleansing Deodorant is non-comedogenic and noninvasive. Although individual results may vary, in a clinical test all subjects showed no adverse effect or allergic reactions. Shaving and waxing may contribute to skin irritation. Wait a day or two before reapplying. Should a slight swelling of the underarm area occur, or slight pustule development appear during the first few days of use, do not be concerned. This is a visible sign that your body is cleansing impurities. This is a temporary sensory reaction and should subside within a few days. Discontinue use if signs of irritation or pain persist. We do not recommend using Detox Cleansing Deodorant™ while pregnant, nursing, or for children under seven years of age.

How long does Detox Cleansing Deodorant™ last?

A 2.5 oz container may last up to two or three months. We recommend applying 2-3 swipes to clean underarms nightly. With the every day absorption of impurities, the need to cleanse will never diminish. Detox Cleansing Deodorant™ is safe to use on a regular basis as a cleansing maintenance program.
